Qué es Deep learning?

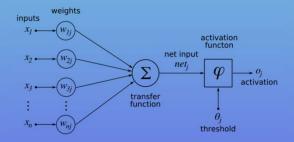

Redes neuronales no siempre fueron profundas

1943 El primer modelo matemático de una neurona (McCulloch-Pitts)

1957 El perceptrón

1959 Hubel y Wiesel descubrieron las células simplex y complex en sistemas de visión biológica.

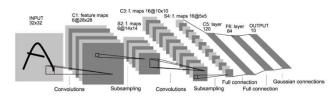

1965 Primera red profunda (8 capas) – Ivakhnenko and Lapa 1979 Red neuronal para reconocer patrones visuales (Neocognitron) – Fukushima

1982 Primera red recurrente – Hopfield

1986 Algoritmo Backpropagation

1989 Redes neuronales convolucionales

Handwritten recognition

1989 Reinforcement learning
– Q-learning

Redes neuronales no siempre fueron profundas (no tanto) **1997** Long short-term memory. Redes recurrentes que recuerdan información.

1998 Stochastic gradient descent + backpropagation.

2009 Competición Imagenet para clasificación de imágenes a gran escala.

2011 Alexnet

2012-2015 Arquitecturas mejoradas para reconocimiento visual –

2014 Redes generativas adversarias (GAN)

2015 ~ Explosión de la industria DL

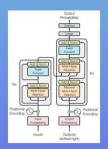

DEEP LEARNING INDUSTRIES

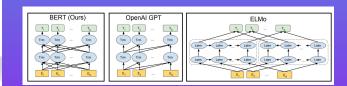

Redes neuronales profundas

2014 Mecanismo de atención – Bahdanau et al.

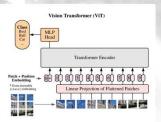

2017 Arquitectura Transformer – Machine translation.

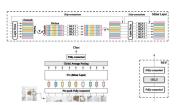

2018-2020 Modelos de NLP: BERT, GPTs, XLM

2020 Vision Transformer

2021 MLP Mixer

2022 Dall-e, Imagen, LaMDA

Text autocompletion

Write With Transformer

Get a modern neural network to auto-complete your thoughts.

Nuestro curso

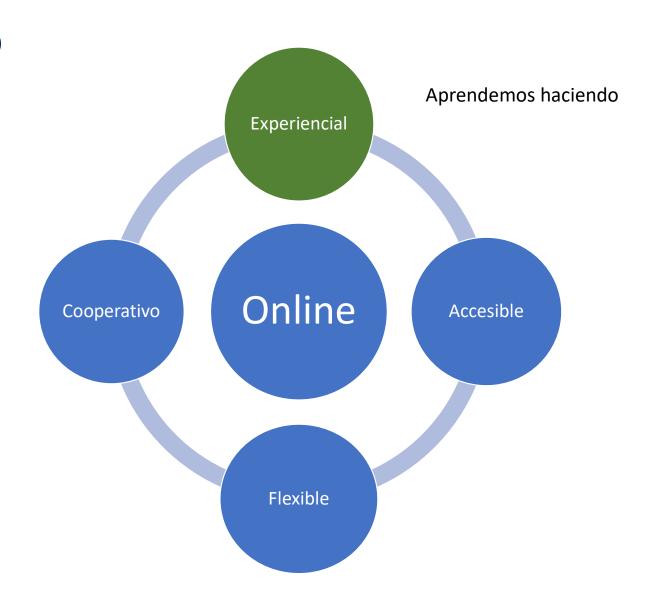

Todas las clases remotas y grabadas. Todos los recursos disponibles online

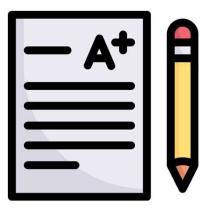

Formato Experiencial Promover que todes participen Online Cooperativo Accesible en el desarrollo del curso. Flexible

Evaluaciones

- Cinco tareas
 - Mini-proyectos (casos). Para experimentar y analizar.
- Trece quizzes
 - De la semana 2 a la semana 14.
 - Cuestionarios rápidos para resolver en 15 minutos.
 - Disponibles durante todo el día Lunes de cada semana.
- Nota final: 80% promedio de tareas + 20% promedio de quizzes.

Kerismaker - FlatIcon

Recursos

- Libros
 - Deep learning, Goodfellow, Bengio, Courville (https://www.deeplearningbook.org/)
 - Neural networks and Deep learning, Nielsen (http://neuralnetworksanddeeplearning.com/)
 - Dive into Deep Learning. Zhang, Lipton, Li, Smola (https://d2l.ai/)
 - Deep learning on graphs. Ma, Tang (https://web.njit.edu/~ym329/dlg_book/)
- Otros cursos
 - CS231n Stanford: Deep Learning for Computer Vision (http://cs231n.stanford.edu/)
 - Deep learning New York University (https://atcold.github.io/pytorch-Deep-Learning/)
- Canal Discord
 - https://discord.gg/AS3brRvPDF
